At Deutz-Fahr we're proud to provide farmers and contractors with state-of-the-art tractors that increase productivity, have modern powerful engines and innovative time-saving features.

The Deutz-Fahr story dates back more than a century, developing our first tractor in 1894 and starting the mass production of standard tractors in 1927. Ever since we've played a leading role in the evolution of farming mechanisation.

Today Deutz-Fahr's extensive range of tractors include models from 75 to 340Hp and come in a number of specifications to suit farmers and contractors alike. The technology in a Deutz-Fahr tractor extends from cost-effective fuel efficiency and high-tech engines and transmission to high-visibility operator environments that provide the ultimate in comfort and usability.

Be part of the continuing Deutz-Fahr story by calling your local Power Farming dealership today, and not only will we get you behind the wheel of one of these innovative tractors for a demonstration, we'll pay you \$1,000 for your time if you buy another tractor.\*\* #trydeutzbuydeutz
