

# NEW Q-SERIES

## Loaded with intelligence

The Q-series now introduces a digital platform into the world of loaders: Q-companion. An all-in-one digital solution for effective and safe front loader operation.

# THE FUTURE IS HERE IT'S CALLED Q-COMPANION.

As a modern farmer, you are constantly looking for smarter ways to work. The Q-series is designed to harmonize with your tractor in every way. Perhaps most importantly, the Q-series now introduces a digital platform into the world of loaders: Q-companion. An all-in-one digital solution for effective and safe front loader operation.

## THE MAIN FUNCTIONS

The Q-companion has three main functions:

**Loader status monitoring.** Q-companion allows you to monitor your loaders position, angle and remaining lifting capacity at any time from a display inside the tractor cab. Tools that will increase your precision and safety.

**Load weighing.** Q-Companion calculates and displays the loaded weight during normal lifting and keeps track of the total. You can also set a target weight and export your weighing results when done. Let Q-Companion keep track of your work for you.

**Adaptive maintenance reminder.** Based on your real loader usage, Q-Companion will remind you when it is time to lubricate and check your bolts, thus enabling an even longer life span and greater value for money. Maximize your actual working time with Q-Companion.

The user-friendly Q-companion is plug-and-play on all Q-series loaders and supports all types of tractors and control systems. And, it's easy to get started – just follow the on-screen step-by-step guide.

## In the forefront

Farming is changing, and with Q-companion you will be in the forefront. By integrating state of the art sensor technology on to our loaders, the new Q-series is prepared for the future. Your efficiency is our guideline, and we guarantee you will work smarter knowing your loaders position, loaded weight and maintenance status just by looking at the color display.

## THE SUPPORT

As a Trima owner, you'll not only have a world-leading front loader, but also world-leading level of reliability and service. Your purchase does not end our commitment to you – it's only the beginning.

Your Trima has to perform at its best for a long time. We have built up a strong global organisation with a comprehensive service network, giving you easy and fast access to locations for service, spare parts and knowledgeable support - wherever you operate in the world. You can be sure that our service and support meets the same standard as our products – always aiming for 100 percent customer satisfaction. To us, second best is not enough.

**Absolute customer focus.** In order to support you as a customer, we have created routines that ensure all the departments in our organisation are focused on your requirements.

**Quick online help.** You'll have round-the-clock online access to spare part details, instructions and other important information.

**Tight-knit spare part network.** Spare parts are available from our subsidiaries as well as from larger Trima representatives the world over.

**Proximity.** Our world-leading distribution network guarantees proximity to you, no matter where you are.

Global technical support. As a Trima customer, you always have access to prompt technical support. All over the world, our representatives can provide knowledgeable and high-quality service.

**Constant follow-up.** Your viewpoints and suggestions for improvement are gathered together and centrally processed. This follow-up functions as a valuable basis for us when developing new loaders, implements and subframes. The development of Trima is the result of close cooperation with users all over the world.

# ”We take great pride in forward-thinking”

Since 1949, we have invented and refined the art of making front loaders. Today, we have top-of-the-line production facilities all over the world. We test-run every detail on our products meticulously, to meet the demands of modern farming and build the best loaders possible. Meet our Product Manager for loaders, Urban Rönqvist.

– Continuous development, decade after decade. That is the core of our long and successful history. And it also points to our future, says Urban Rönqvist, who has overseen the long, meticulous work from the developers at Ålö, leading up to the new Trima Q-series.

The history behind Ålö starts with the idea of company founder Karl-Ragnar Åström. In the mid-1940s, he inherited the family farm in Brännland, just outside Umeå in Sweden. At this time all loading and unloading was done manually. In 1947, Karl-Ragnar designed the first Swedish front loader for his own use.

– Karl-Ragnar’s spirit of invention still lives on at Ålö. It’s part of our DNA. Being at the forefront of design and development means that we are constantly looking for improvements, both large and small. We take great pride in forward-thinking, says Urban Rönqvist.

Today we are market leaders in more than 15 countries and the undisputed world leader in front loaders and associated implements, with state of the art production facilities in Sweden, USA, France and China.

Karl-Ragnar Åström, being a farmer himself, had one single goal in mind when he created the first Ålö loader in the 1940s: To facilitate and rationalise the farmer’s work. That goal still applies today.

– When you supplement your tractor with a Trima you should know that you are acquainting yourself with a loader range that is designed with total regard for your needs, a range that has been tried and tested for many years, says Urban Rönqvist.

Some front loaders in this brochure are fitted with extra equipment. Certain products may be optional extra equipment. Some of the products are not available on all markets. Product specifications and performance data stated can vary depending on the tractor model. Working with front loaders and accompanying implements is not without risk. Serious injuries to people and damage to materials can occur in the event of incorrectly carried out work. Show consideration to your surroundings, use common sense and comply with local laws and regulations. Always read carefully through the instruction manual supplied. Only use original spare parts and accessories. Ålö's product range is continually being developed. We reserve the right at any time to alter specifications, prices and versions with no obligation on our part. ©,™ Trademarks of Ålö AB.
