

DEUTZ-FAHR BUY BACK GUARANTEE

Overview

**GUARANTEE THE FUTURE VALUE OF ONE OF
YOUR MOST IMPORTANT INVESTMENTS**

**DEUTZ
FAHR**

The grass is greener.

GUARANTEE YOUR NEW TRACTOR'S FUTURE VALUE.

Plus increase productivity and maximise your bottom line with the latest innovations from a German designed tractor.

With the DEUTZ-FAHR Buy Back Guarantee, remove uncertainty in the purchase of one of your largest investments. Utilise the services of a finance package that is tailored to your needs and aligned with your business requirements.

The DEUTZ-FAHR Buy Back Guarantee ensures you get the benefits of having the latest technology and fuel efficiency, whilst having the added benefit of knowing the future value of your tractor at the end of your desired term. It's flexible – choose your contract term, agree your 'yearly hour worked allowance' and at the end of your term (provided

all conditions are met) you have three great options to consider: Renew, Retain or Return. All we ask is that you keep your servicing up-to-date and for all servicing and repairs to be carried out through one of our authorised Power Farming Dealerships, this will also ensure your tractor is kept in perfect working condition.

We accept that fair wear and tear will occur, please speak to your Power Farming Dealer for further information about the terms and conditions.

DEUTZ-FAHR Buy Back Guarantee. The grass is greener.

DEUTZ-FAHR BUY BACK GUARANTEE.

A flexible finance solution tailored to your needs.

With the DEUTZ-FAHR Buy Back Guarantee you'll have a hassle-free finance agreement plus peace of mind from the moment you step into your new tractor.

Here's how it works:

1. Start by selecting the DEUTZ-FAHR you want.
2. Choose the contract term which suits you best (24 months, 36 months, 48 months or 60 months).
3. Next, agree the annual hourly allowance (e.g. 1000 hours per annum).
4. Choose your deposit amount (which also gives you the option to reduce your repayments to fit your budget).
5. We'll then calculate the assured future value based on the total hourly allowance and your chosen contract term.

Secure your future, reduce your risk.

When you've finished your term, we can look at options that suit your business objectives:

Renew – if you'd like to upgrade to a new DEUTZ-FAHR, your guaranteed future value will contribute towards the purchase of your new tractor.

Retain – if you'd like to own your DEUTZ-FAHR at the end of your agreed term you can buy it outright, by refinancing or paying the balance.

Return – if you decide to return your DEUTZ-FAHR, then provided the tractor meets the fair wear and tear conditions, it's within the agreed hourly allowance and you've made your regular payments, we'll take it off your hands.

RELIABILITY

#AlwaysOnYourSide

DESIGNED IN DEUTZ-FAHR LAND.

Advanced technology with a history of success.

The goal of DEUTZ-FAHR is to supply farmers and contractors with state-of-the-art agricultural machines that facilitate work and maximise productivity. Designed in DEUTZ-FAHR LAND in Lauingen, Germany the brand offers a full line range with contemporary style, high levels of comfort, modern powerful engines and forward-thinking features.

Every champion has a story. And the DEUTZ-FAHR story dates back more than a century. DEUTZ-FAHR has shown character and ambition for growth ever since its foundation and over the years the company has played a leading role in the evolution of agricultural mechanisation.

In 1927, it launched its first mass-produced tractor – the Deutz MTH 222 – and in 1936, unveiled the Deutz 11 Series, which brought agricultural mechanisation within the reach of small farms for the first time. In the years that followed, DEUTZ-FAHR kept up its drive for technological evolution, with a view to increasing the productivity of

farmers and the efficiency of its own machinery. In 1949, it introduced air-cooled diesel engines on several models, and in 1962, unveiled the first hydraulic lift. In 1992, the company developed a new concept of visibility, with the first “clear view” tractor, and in 1995, it launched the Agrottron Series, which redefined the concept of what an agricultural tractor should be, by incorporating a spacious, panoramic cab and the market’s first suspended front axle. In 2001, DEUTZ-FAHR introduced a game-changing technological innovation with the Agrottron TTV, its first tractor with a continuously variable transmission.

Many years have passed since the launch of the first mass-produced tractors, but even today, the DEUTZ-FAHR name still fires the imagination of farmers all over the world.
